

## **ROCK SOCCER- MOWING DIRECTIONS**

**SPRING 2007 Fields in Use: 14, 15, & 16**

- 1. Please check the game calendar and see which fields have games for the week.**
- 2. Mowing later in the week is better, but there is always potential for rain.  
If you don't get the fields mowed due to rain, let someone know ASAP so we can find someone that could do it right before the game, if you're not available.**
- 3. Mow the fields in the following priority  
Fields to be used for the upcoming weekend (In case you can't finish, at least the playing surface is done).  
Areas around the fields being used for that season (from the parking lot to the back tree line).  
Fields not being used for the season (Rock Fields are #12- 16)**
- 4. When mowing- USE EXTREME CAUTION !!!**

### **WEAR YOUR SEATBELT WHENEVER RIDING THE MOWER !**

**Never allow more than 1 person on the mower at a time.**

**Check over fields to make there is no debris, trash, sticks, etc. that would damage the blades.**

**Do not mow on fields being used for games or practices.**

**Slow down, it may take a little longer, but we want to keep you, the mower, and kids all safe.**

### **USE EXTREME CAUTION AROUND TREES, GOALS, SIGNS !**

**Make sure the decks do not get caught- it will bend the linkage.**

**This mower behaves differently than a car, it is rear steering. It is expensive to repair.**
